

# Rototuff™

## Rotational Moulding Powders

## MICROPELLETS

## RT705 General Colours

Vibrant Colours for Rotomoulded Products

Based on more than 9 years industry experience, Micropellets are passionate about providing well designed products to rotational moulders in Asia Pacific. The Rototuff™ RT705UV base resin and the addition of colours comply with the Australian Standard for Plastic Materials for Food Contact Use, AS 2070-1999.

General Colours provide excellent: Heat Stability | Weatherability | Light Fastness | Colour Stability

Colour Card Disclaimer: Every effort has been made to represent our colour range as accurately as possible on this card. However, even slight differences in lighting and surface finish may result in differences in appearance being seen compared to the actual colours in the Polyethylene compound. This colour card should therefore be used as a guide, with confirmation of colour being made using Micropellets Rototuff™ Polyethylene colour swatches.
